

5.0 Banners

Easily display banners from your sponsors, define an expiration date, and monitor clicks with the built-in **QuantumThemes Banner plugin**.

The screenshot shows the 'Banners' management interface. At the top, there's a 'Banners' header with an 'Add New' button and a 'Screen Options' dropdown. Below this, a filter bar shows 'All (4)' and 'Published (4)' with a search bar and a 'Search Banners' button. A table lists four banners with columns for ID, Banner, Expiration date (Y-M-D), Clicks, and Image. Each banner has a checkbox in the ID column and a small image thumbnail in the Image column. At the bottom, there's a 'Bulk Actions' dropdown and an 'Apply' button, along with a '4 Items' count.

<input type="checkbox"/>	ID	Banner	Expiration date (Y-M-D)	Clicks	Image
<input type="checkbox"/>	2519	Sponsor Four	2015-08-19	3	
<input type="checkbox"/>	2518	Sponsor Three	2035-03-27	Unknown	
<input type="checkbox"/>	2514	Sponsor Two	2034-09-10	4	
<input type="checkbox"/>	2512	Sponsor One	2030-05-19	Unknown	
<input type="checkbox"/>	ID	Banner	Expiration date (Y-M-D)	Clicks	Image

How to create a new banner:

1. Be sure that the Quantum Banner plugin is installed in your plugins. If installed, a "banner" link will appear in your WP Admin menu. If there isn't please go to: appearance -> plugin installation and install it from there. Otherwise, install it manually via FTP by unzipping the qt-banner.zip file provided with the product, upload it to the wp-content/plugins folder and activate it from the Plugins page of your WordPress Admin page.
2. Once installed, go to Banners -> Add new
3. Set a title for your banner
4. Set an expiration date (after that date, the banner will not appear in the widget, but will never be deleted from the admin panel)
5. Set the URL where the banner needs to point. These links are executed with a 301 redirect, and WordPress will take care of counting the clicks
6. Set a number of starting clicks, like 0
7. Set a featured image, which will be the banner picture. Use a squared image sized at 500 x 500 pixels.

How to display banners:

The banners can be displayed with the widget included with the plugin.

1. Go to Appearance -> Widgets
2. Add the QT banners widget to a sidebar

QT Banners Widget: Banners

General options

Title:
Banners

Add only specific banners (by post ID, comma separated):

Quantity:
2

Order
Random
☒
Page Order
☐

[Delete](#) | [Close](#)
[Save](#)

3. You can choose the banners that you want to display by entering the ID of them. The ID of each banner is available by going to: banners -> Show all
4. Choose the maximum amount of banners to display
5. Order: they can be random or can be ordered by a Page Order attribute on each banner
6. Save the plugin settings.
